

The Benefits of Sunbrella Fabric

Why is Sunbrella Fabric so Good?

1. **Fade resistant.** This is one of the top two reasons to choose Sunbrella Fabric as it's a solution dyed acrylic fabric which means that each string is coloured all the way through, and not only on the surface as other fabrics are. Choosing a product made with a Sunbrella fabric will preserve them from fading over time due to temperature, UV and rain.
2. **Water and Mould Resistant.** The other reason for choosing Sunbrella fabric is that it is water, mould and mildew resistant. As Sunbrella is made from acrylic, which is plastic, it is less likely to absorb water and leave stains. It is always recommended to clean the fabric before storage to avoid mildew build up.
3. **Easy to Clean.** Sunbrella is the perfect fabric choice for people with kids and pets. The material isn't porous, so liquids form pearls on the surface.
4. **Time Resistant.** Because Sunbrella fabrics are made with top grade materials, they are highly durable. With proper care, products made with Sunbrella fabric have an estimated lifespan of up to 10 years of heavy outdoor use.

How to Clean a Sunbrella Fabric Product?

Day to day care of a Sunbrella fabric is simple. All you need is a little bit of soap and water. Before you begin cleaning with soap and water, brush off any dirt from the surface, then rub with the soap and water. Let it soak, then rinse abundantly with clean water and allow to dry.
