

Nardi Komodo Outdoor Resin EcoWall

Product Images

Description

Create your own partition that matches the Nardi Komodo collection with the Komodo EcoWall. Made in Italy from regenerated resin, obtained from the recycled polypropylene furniture, the EcoWall is UV resistant and characterised by a strong resistance to atmospheric pollutants; non toxic and antistatic.

The recyclable resin trademark guarantees that each product is made with 100% recyclable resin and can be crushed and completely recycled without producing waste or damaging the environment. The new Komodo EcoWall is available in a stunning Terra Brown colour.

The Komodo range is an award winning design by Raffaello Galiotto and won first place at the Gardiente Outdoor Living Award German Trade Fair in July 2018. Komodo stands out for its design in motion with thrilling interwoven patterns inspired by the branches of a tree. The modules can be freely combined vertically or horizontally to complement the look of the environment and create privacy.
