Description

Allure Outdoor Sun Lounger

A full length poolside lounger on a powder coated aluminium frame, upholstered in a quick dry outdoor fabric. At 208 cm long it is a lounger you lie down on properly rather than a short deck chair, and the quick dry upholstery means it is usable again shortly after rain instead of staying damp all morning.

The light grey and charcoal are upholstered in Sunbrella, which is solution dyed, meaning the colour goes into the fibre before it is woven rather than being printed on the surface. That is why it holds its colour in full Australian sun where a printed outdoor fabric fades, and it is why the Sunbrella fabric carries a 5 year warranty of its own. The pebble is upholstered in a high quality outdoor fabric rather than Sunbrella, and carries a 2 year warranty.

Aluminium is the right frame material for a poolside setting: it will not rust in chlorine or salt air, and at 18 kg one person can reposition the lounger through the day to follow the shade. It arrives fully assembled, so it goes straight onto the deck.

Key Features

OUTDOOR UPHOLSTERY

Light grey and charcoal are solution dyed Sunbrella acrylic, so the colour is in the fibre rather than printed on it, covered by a 5 year fabric warranty. Pebble is a high quality outdoor fabric with a 2 year warranty.

QUICK DRY, BREATHABLE

The upholstery drains and breathes, so the lounger is usable again shortly after rain and does not hold heat against you.

ALUMINIUM FRAME, NO RUST

Powder coated aluminium. It will not rust in chlorine or salt air, which is what a poolside lounger has to survive.

208 CM FULL LENGTH

Long enough to lie out flat rather than sit propped up, which is the difference between a lounger and a deck chair.

ARRIVES ASSEMBLED

No build required. The delivery goes straight onto the deck or the pool surround.

18 KG

Light enough for one person to move it through the day and follow the shade, but not so light that it skates on tiles.

Colour. Three colourways: light grey Sunbrella fabric on a white powder coated aluminium frame, charcoal Sunbrella fabric on a charcoal powder coated aluminium frame, and pebble, a high quality outdoor fabric rather than Sunbrella, on a matching powder coated aluminium frame.

Complete the setting. The Allure Outdoor Side Table sits at lounge height for a drink and a book, and a purpose made Allure outdoor cover is available in black. The Allure 3 Piece Set pairs two loungers with the side table if you are setting up both sides of a pool.

Care & Cleaning

Clean with mild soapy water and a soft cloth or brush, then rinse with fresh water. Avoid solvents, bleach and abrasive pads. Let the upholstery dry fully after rain rather than covering it damp, and in coastal areas rinse the frame more often to clear salt spray. Use a cover or store it under shelter through long periods out of use.

Frequently Asked Questions

Will the fabric fade in full Australian sun?

The light grey and charcoal use Sunbrella, which is solution dyed, so the pigment sits inside the fibre rather than on the surface. That is what makes it hold colour outdoors, and that fabric carries a 5 year warranty separate from the frame. The pebble uses a high quality outdoor fabric rather than Sunbrella, with a 2 year warranty.

Can it stay outside all year?

Yes. The aluminium frame will not rust and the fabric is made for permanent outdoor use. A cover or sheltered storage through long periods out of use will still extend its life.

Does it need assembly?

No. The sun lounge is delivered fully assembled.

How long is it?

208 cm long, 75 cm wide and 40 cm high, and it weighs 18 kg.

Is it suitable for a resort or a commercial pool area?

Yes. It is specified for resort pool areas as well as home poolside and patio use.

Additional Information

Product Code	ALLURE SUNLOUNGER
Weight	18 kg
Height	40 cm
Width	75 cm
Depth	208 cm
